http://scontent-b-sea.xx.fbcdn.net/hphotos-ash4/1474532_687505797947263_688045139_n.jpg LIVING ROCKS?

God is sure creative. The fact that this sea creature looks exactly like a rock with guts is not even the weirdest thing about it. It's also completely immobile like a rock — it eats by sucking in water and filtering out microorganisms — and it's clear blood mysteriously secretes a rare mineral called vanadium. Also, it's born male, becomes hermaphroditic at puberty, and reproduces by tossing clouds of sperm and eggs into the surrounding water and hoping they knock together. This goes against everything evolutionists believe because it's part rock part living organism. Next they'll be saying rocks can evolve.

Biblical Creation I was making a point. God can do and make anything. Nature makes sense in God's created kingdom. Only an evolutionist would actually believe this was part rock as Cliff pointed out

Kyle Sweezy You are all quite bold declaring the word of God is false, denying Him his creation... You had better be right because if your not you are going to meet with a God that did create you and the universe. And you spent your time on earth persecuting Him. As for us that believe we are encouraged and our faith is strengthened because the word of God said you would act this way

Ryan LaFleur Can you explain why this supposedly backs the evolutionary theory?

Like · 6 hours ago

▪

Luke Dyton It evolved that way. Perfect camouflage for it's environment. Secretly feeding itself, and secretly reproducing itself. It adapted/evolved for the environment around it. Born male, becomes hermaphroditic at puberty, and reproduces by tossing clouds of sperm and eggs into the surrounding water. It's everything that evolution explains. I'd love for you to point out a part of the bible that explains something even close to this.

Like · 10 · 4 hours ago

Michael Swenson Luke Dyton, evolutionists have been saying that a less complex creature with fewer cells and lower cognitive function, surveyed its surroundings and not only was so intelligent, and so perceptive (despite their inability to show this organism has the means to perceive and the cognitive function to meditate on it's surroundings) was not only so intelligent but so powerful that it changed it's own genetic structure of a simple life form and perceiving rocks and understanding rocks, decided to morph itself into a camouflaged rock. Luke if you really believe that, why are you not bowing down to this superior creature? after all with your perceptive abilities and cognitive function; without rational explanation you attribute creative super powers and perceptive skills and even prognostic powers (that this creature decided it's best chance of survival was to become something that resembled a rock; as opposed to deciding to become something fluid like the water it is in or another kind of organism in the oceans); but you assign this level of genius and reasoning skills AND SELF TRANSFORMING SUPER POWER to this organism and other lower life forms. You are saying this creature and others who have no means to do such things as perceive, meditate, and self-reflect; let alone conceive of the will of self-transformation all have a SUPER POWER that they are not only able to do all the above; though there is no visible scientific explanation to give them such abilities, to AT WILL, TRANSFORM THEIR OWN DNA IN THE MILLIONS OF CELLS of their own physical form! Things that you cannot accomplish. A creationist says the REASON this creature has such appearance as camouflage as a rock and reproductive function; is that the DNA code programmed into this creature accomplishes all those amazing feats. That a simple amoeba did not have in itself the ability to say part of my descendents will become plants that fill the world with billions of species and part will become insects, animals, etc. and yes, even a part will transform itself into this rock camouflage creature! (most who actually think about what they observe understand ALL these things were uniquely designed as such by INTELLIGENCE) and Creationists are saying to evolutionists that we wish you'd use yours to recognize that.

CATERPILLAR THAT PRETENDS TO BE A SNAKE!

This is NOT a reptile! This is the larva of the Hemeroplanes triptolemus moth. In its larval form it is capable of expanding its anterior body segments to give it the appearance of a snake, complete with simulated eyes. It's mimicry extends even to the point where it will harmlessly strike at potential predators. Now how could it have figured all that out without a Creator??

f The Illogical Atheist

THE CHANCE OF THE GAPS FALLACY

“Statistical reasoning must be capable of eliminating chance when the probability of events gets too small. If not, chance can be invoked to explain anything. Scientists rightly resist invoking the supernatural in scientific explanations for fear of committing a god-of-the-gaps fallacy. Yet without some restriction on the use of chance, scientists are in danger of committing a logically equivalent fallacy—one we may call the “chance-of-the-gaps fallacy.” Chance, like God, can become a stop-gap for ignorance.

WILLIAM DEMBSKI Mathematician
“The Chance of the Gaps,” p 1

The Kentucky Print

The strata in which these prints were found are dated at 354 to 290 million years ago and would pre-date the scientific communities accepted date of modern man by many millions of years.

Paleo Conclusions: "Claims that human footprints occur in Paleozoic rocks of Kentucky are without foundation. The relatively few such prints documented with photos show very unnatural shapes and lack the usual features of authentic human prints. They were probably made by native Americas--not with their feet in soft mud, but with their hands and sharp tools."

NOW DOES THAT SOUND LIKE OBSERVABLE SCIENCE TO YOU.

[Http://paleo.cc/paluxy/berea-ky.htm](http://paleo.cc/paluxy/berea-ky.htm)

Convincing prints in Kentucky millions of years out of place

[Luke Lefebvre](#) to [Proving the Reality of the Flood of the Bible](#)

[July 26, 2015](#) ·

How can the Kentucky print be found in rock that's 300 million years old when man wasn't even there at that time. And I love the way Paleo makes a conclusion about the whole thing. It was possibly or maybe or perhaps or it might've been. You know the usual words that accompany evolution. Empirical evidence doesn't say maybe perhaps possible might have been. No tracks at the Paluxy river has been debunked it's just lacking in evidence. It's still stands as the Kentucky print and it can't be in rock that's 300 million years old. Problematic for sure
